

Data Center Valve Solutions

Build trust and grow your project funnel with winning bids and proven project delivery

Your edge in the fast-paced, ultra-competitive data center buildout

The pace of data center construction is accelerating. Projects are being scoped, bid, awarded and delivered faster than ever. The right supplier partnership can optimize design, accelerate delivery and help your teams focus on what really matters: building differentiated, winning solutions in a high-stakes market.

What We Do

As an expert valve partner, our partnership with Emerson can add unique value to your data center projects:

- 1** Our leading valve technology means you can select products with confidence that meet developer uptime and energy efficiency goals.

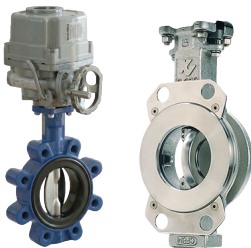

Superior valve technology
- 2** Our deep application expertise is applied to complex project specifications to yield tested solutions that unlock value for differentiated, competitive bids.

High-capacity manufacturing
- 3** The strength of Emerson's global manufacturing capabilities, local inventory and on-site support delivers against aggressive project schedules.

Deep global supply chain
- 
In-region inventory
- 
Specification expertise
- 
On-site services and support
- 
Single vendor accountability

Valve Solutions

Backed by trusted brands such as Keystone™ and KTM™, Emerson has an unmatched valve technology portfolio with local capabilities to deliver fully integrated solutions that are assembled, calibrated, tested and ready to install.

Butterfly Valves

Achieve bubble-tight shutoff and modulating flow control over an extended cycle life.

Ball Valves

Ensure high flow, tight shutoff and simple installation in cooling distribution systems.

Actuation Solutions

Match the requirements of your system with compact, efficient and economical actuators.

Technology Selection Matters

Fast-acting, tight shutoff valve operations that deliver uptime commitments.

Precision geometries maximize flow to drive lower PUE and energy costs.

Robust materials and proven cycle life deliver long term cooling reliability.
