

ANDERSON GREENWOOD 5910C PRESSURE VACUUM RELIEF VALVE WITH FLAME ARRESTER COMBINATION

Integrated solution to protect tanks from excess pressure and vacuum scenarios while also preventing explosion from external heat and ignition sources.

FEATURES

- Element and shroud optimized for flow efficiency
- Oversized pressure and vacuum ports provide maximum flow capacity
- Easily removed hood and elements for inspection and maintenance
- Replaceable and interchangeable pressure and vacuum seat rings
- Modular design allows for reduced number of spare parts required

GENERAL APPLICATION

The 5910C is a Pressure & Vacuum relief valve, with integrated Flame Arrester, designed to protect above ground storage tanks containing potentially flammable liquids and vapors from rupture or explosion by over-pressure and from external heat and ignition sources. This integrated solution combines decades of proven flame arrester performance and tank venting experience into one combined unit that is light weight and easy to maintain.

TECHNICAL DATA

Materials:	Aluminum, carbon steel, stainless steel
Sizes:	2" to 8" (DN 50 to 200)
Connections:	Drilled flange
Settings:	up to 1 psig (69 mbar)
Temperature Range:	-20 to 60°C (-4 to 140°F)
Gas Groups:	IEC Classification IIA
Certification:	ISO 16852

ANDERSON GREENWOOD 5910C PRESSURE VACUUM RELIEF VALVE WITH FLAME ARRESTER COMBINATION

MODELS OVERVIEW

The 5910C Series relief valves protect tanks from excessive pressure and vacuum, maintaining system operating pressure so vapor is not vented to the atmosphere routinely.

The flame arrester protects the tank from accidental ignition of vapor within the tank. It is designed to stop the propagation of flame from external sources.

OPERATION

Whenever the tank pressure or vacuum exceeds the setting, the pallet lifts. Only excess pressure is vented to the atmosphere. Air is drawn into the tank only to relieve an excess vacuum condition. The valve remains closed when the vapor space remains within normal operating pressure.

The valve pallets are deadweight loaded with a field adjustable pressure setting range. Side and center pallet guides are incorporated for stability. 'Air cushion' PTFE seat inserts ensure a tighter seal and can be replaced easily.

If H₂S corrosion is a concern, supplying the relief valve with 316 SS trim is an option. The flame arrester bank is also available in 316 SS.

The flame arrester helps stop the propagation of a flame by absorbing and dissipating heat through the surface area of the Element. Heat is absorbed as ignited gas attempts to pass through the small passages within the Element assembly. This action lowers the temperature of the gas below its ignition point and quenches the flame.

The Element assembly can be inspected easily and cleaned to remove any dirt or residue build-up

SPECIFICATIONS

The 5910C pressure and vacuum relief valves are available in a variety of configurations to meet your specific needs.

Sizes

2" (DN 50)
3" (DN 80)
4" (DN 100)
6" (DN 150)
8" (DN 200)

Connections

- Aluminum
 - Drilled to ANSI Class 150 dimensions (flat face)
 - Drilled to DIN 2633 (16 bar) dimensions (flat face)
- CS and SS body
 - Drilled to ANSI Class 150 dimensions (raised or flat face)
 - Drilled to imperial DIN 2633 (16 bar) dimensions (raised or flat face)

Mounting studs

- Fractional (imperial) ANSI 150
- Metric DIN 2633

Settings

Pressure and Vacuum settings available as per Table 1

Testing

Each valve is tested for proper setting and for a leakage rate of less than 1 SCFH (0.03 Nm³/hr) of air at 90 percent of the set point. Each valve is tested for leak tightness at 75 percent of set point as required in API Standard 2000.

Flame Arrester standard specification

Each unit comes equipped with two Flame Arresting Elements. The elements are approved for service in accordance with ISO16852 for Gas Group IIA.

Lower settings may be available. Please consult your sales representative.

All values are factory tested for leakage and correct setting prior to shipment.

Certification of valve setting is available upon request.

Stand setting weights are lead.
