

# Bring Your Electro-Hydraulic Actuator into the 21<sup>st</sup> Century

Replace your **Obsolete** Fisher Governor '350' Series with a MEA Hawk Electro-Hydraulic Actuator.

- 1 Drop-in replacement** - Reuses existing yoke, mounting holes, and wiring.
- 2 Latest Technology** - Faster, more accurate, virtually leakproof design.
- 3 User Friendly** - Easy to install, calibrate, and maintain.
- 4 Additional Information** - Position feedback, alarms, and diagnostics.
- 5 Customizable Setup** - Customizable opening/closing speeds and failure modes.
- 6 Low Power Consumption** - The motor only runs when the actuator repositions.

## STEP 1

### Specify Voltage

Specify 120/240 VAC or 480 VAC Power.

## STEP 2

### Remove 350

Existing yoke and wiring can be reused.

## STEP 3

### Install Hawk

Four bolt installation and simple calibration.
