

Control Southern Inc. Now Offering Emerson's Daniel Flow Measurement and Control Products

SUWANEE, GEORGIA (June 2014) – Control Southern Inc. now represents Emerson Process Management's Daniel™ flow measurement and control products.

With the pressures of limited budgets, shrinking plant workforces, and strict process efficiency requirements, it is imperative that plant operators can ensure precise measurement and control of product output.

Emerson's Daniel products allow end users to overcome these challenges by reducing measurement uncertainty, unplanned downtime, and maintenance. The Daniel line includes solutions for a variety of gas and liquids production, transmission, transportation, and distribution applications, including gas and liquid ultrasonic flow meters. Equipped with diagnostic intelligence, these flow control and measurement offerings provide personnel with valuable process performance insights for informed decision-making.

“Our customers face immense pressure to maximize product quality while minimizing financial and safety risks,” noted Control Southern president Doug Turner. “They need dependable, repeatable flow measurement technology, and it's now available to them with Daniel. We are excited to represent the Daniel solution to our customers.”

For gas industry applications, Control Southern serves Georgia and northern Alabama. For liquids industry applications, Control Southern serves Georgia, northern Alabama, and Tennessee.

About Control Southern

Headquartered in Suwanee, Georgia, Control Southern (www.controlsouthern.com) has been a trusted automation partner for the process industries in the Southeast for more than 58 years.
